PROFORMANCE Unveils Latest Version of INFO-ACCESS

-Leading software developer introduces updated loan exception tracking and collateral management software platform-

Spring, Texas, Apr. 02, 2007—PROFORMANCE Inc., a provider of integrated document automation solutions to the financial services industry, unveiled the latest version of its automated commercial loan tracking software platform, INFO-ACCESS 2.0.

In addition to tracking loan documents and collateral, INFO-ACCESS now features non-document tracking capabilities that enable users to track important items, including: loan covenants, loan policy exceptions and event reminders that are necessary in maintaining compliance with lending requirements. Version 2.0 allows users to enter these important non-document items into the system so that they can be accounted for throughout the lending process to reduce the risk of error oftentimes created by the use of outdated or “homegrown” tracking systems. The system is designed to mitigate issues and risks faced by banks regarding exception handling and outside auditor and examiner scrutiny.

“There are a number of important things that banks need to track on a loan besides actual documents,” said Terry Burks, project manager and senior business analyst for PERFORMANCE. “Whether it is a financial statement they need from a borrower on a regular basis or a court date they are required to attend regarding a bankruptcy, this new system will help keep them up to date with what they need to do before loan requirements expire and become exceptions.”

Additional features of the INFO-ACCESS platform include a singular view of a loan portfolio, user-friendly viewing of loan documents and information for customers, templates for customer notice generation, and cross collateral tracking.

INFO-ACCESS 2.0 is scheduled to be available on the market in mid-April.

About PROFORMANCE

PROFORMANCE is a leader in the design and implementation of document automation solutions for the financial services industry. PROFORMANCE integrates enterprise content management (ECM) systems with INFO-ACCESS and INFO-CAPTURE products for banks between \$1 to \$20 billion in assets, enabling customers to quickly and efficiently access documents and business data, mitigate compliance issues, and improve business and operational processes.
